DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

Mount Pleasant is located just north of Maryland Route 34 west of the Antietam Creek between Sharpsburg and Keedysville in Washington County, Maryland. It is situated on an area of level ground above the creek and faces south.

The structure is a two-story, three bay log dwelling set on very low stone foundations. A two-story, four bay ell, also of log, extends to the rear or north. The entire structure is covered with beaded weatherboarding displaying no decorative trim.

Windows appear to be spaced evenly in the front and side elevations of the front section. Lower story windows contain nine over six light double hung sashes, while those at the upper story and the rear section have six over six light sashes. All are held within moderately wide frames, trimmed with quirked quarter round moulding and finished with a beaded inner edge. Six over three light sashes with similar framing are present at the attic level. Windows at the front elevation are flanked with paneled shutters at the main story and with louvered shutters at the second floor level.

The main entrance is located in the center bay of the front elevation. The entrance treatment is simple with framing similar to that of the windows. The door, a relatively modern replacement, is topped with a narrow transom. Other entrances are located in the north elevation of the main section and in the east and west elevations of the ell. All are framed similarly to the windows and employ six-panel doors.

A one-story porch supported by chamfered square posts extends along the front elevation. Extending along the entire east wall of the ell is a double porch framed under the main roof span.

The roof of the main section is quite steeply pitched with high brick chimneys extending from inside each gable end. The rear ell has a slightly lower roof peak with brick chimneys located inside the north gable end and at the jointure of the two sections. Sheet metal roofing terminates at the end walls with tapered barge boards. The eaves are finished with simple boxing.

The interior of the main section is bisected by an entrance and stair hall. East of the hall are two rooms, each with a corner fireplace. West of the hall is one large room across which, in recent years, a partition has been built. The rear ell has been divided into two rooms, each with a fireplace. Interior hardware includes large brass locks and large hinges with round flanges. Marks on the door indicate, however, that these hinges are not original. Interior doors have six panels which are not raised above the stiles.

Immediately behind the house is a two-story stone and brick kitchen with a bake oven. South of Route 34 is a large frame bank barn set on stone foundations. No physical evidence remains of the mill or other dwellings which were part of the complex.

Surviving Civil War photographs of the milling complex show that this house was covered with what appears to be white weatherboarding. Just southeast of the present house was a large two-story

BUILDER/ARCHITECT

STATEMENT OF SIGNIFICANCE

Mount Pleasant, also known as Orndorff's Mill and Mumma's Mill, is significant for its architecture, its contribution to commerce in Washington County during the late eighteenth and early nineteenth centuries, and for the role it has played in U. S. military history.

The house, constructed of logs, is representative of a major architectural group in Western Maryland and southern Pennsylvania. Log was used extensively as a building material in the area from the earliest days of settlement to well into the nineteenth century. Aside from its log construction, however, Mount Pleasant is quite unusual in appearance. Its steeply pitched roof with high chimneys are features infrequently found in Washington County. The structure has the appearance of dating from circa 1800 and thus was not necessarily built by the Orndorff family, who acquired the property in 1762. The Orndorff family, according to numerous sources, was quite prosperous and may have built and resided in one of the other dwellings which appeared among the complex of buildings in the nineteenth century photograph.

Architecturally, Mount Pleasant is significant as an example of turn of the nineteenth century period domestic construction, which has remained to the present with minimal alteration.

Accounts of the Orndorff family indicate that Christian Orndorff established a mill on the Antietam shortly after he purchased 503 acres from James Smith for £654 on November 17, 1762.¹ The flour and sawmills erected by Christian Orndorff were replaced by newer mills built by Christian's son, Christopher in 1782. Christopher sold 303 acres of the Orndorff property, including the milling complex to Jacob Mumma in 1796 for £5,500. The mills were operated by the Mumma family until 1841, although Jacob Mumma apparently resided on the property for some time after the deed was transferred. The mill continued to operate through the nineteenth century, providing a stimulus to the local economy for well over a century.

According to Orndorff family history, flour from the mills was shipped to eastern centers and helped to supply American troops during the Revolution.

The Mount Pleasant property is also important for its association with significant military events in United States history. Several members of the Orndorff family were officers of the Maryland Militia. According to family history, the Orndorff house, during the Revolution, was the scene of many military and policy making

dwelling covered with wooden siding and possibly displaying some stone construction. It had a double porch extending across its entire front elevation and had a large centrally placed chimney stack.

South of present Route 34 and east of the barn was the mill and a one and one-half story dwelling with an exterior stone chimney. East of the creek and south of Route 34 was a two-story, three bay stone dwelling. These buildings have not survived to the present. A 1902 deed to the property (Liber 116, folio 163) describes the land as being "improved with a two-story, weather-boarded dwelling house with back building, a large bank barn, a stone and frame grist mill and saw mill, a stone, two-story dwelling house and other farm buildings..."

Mention should also be made of the three arched stone bridge built by Silas Harry in 1824. Known as the middle bridge after the Battle of Antietam, it was destroyed by high water in the late 19th century.

The remaining buildings at Mount Pleasant are in deteriorated to fair condition. The property contains 130 acres.

#8

conferences hosted by Christian Orndorff, member of the Maryland Committee of Safety. General Horatio Gates is said to have been one of many military officers who stayed at the Orndorff home.

Later, during the Civil War, Mount Pleasant was in a prominent position at the "Middle Bridge" in the Battle of Antietam. Although no extensive action was recorded in the immediate area, the bridge and the road past Mount Pleasant was strategic in the movement of troops.

DESCRIBE THE PRESENT AND ORIGINAL (if known) PHYSICAL APPEARANCE

^{Mount} Pleasant is located just north of Maryland Route 34 west of the Antietam Creek between Sharpsburg and Keedysville in Washington County, Maryland. It is situated on an area of level ground above the creek and faces south.

The structure is a two-story, three bay log dwelling set on very low stone foundations. A two-story, four bay ell, also of log, extends to the rear or north. The entire structure is covered with beaded weatherboarding displaying no decorative trim.

Windows appear to be spaced evenly in the front and side elevations of the front section. Lower story windows contain nine over six pane ^{light} double hung sashes, while those at the upper story and the rear section have six over six light sashes. All are held within moderately wide frames, trimmed with quirked ^{quarter} round molding and finished with a beaded inner edge. Six over three light sashes with similar framing are present at the attic level. Windows at the front elevation are flanked with paneled shutters at the main story and with louvered shutters at the second floor level.

The main entrance is located in the center bay of the front elevation. The entrance treatment is simple with framing similar to that of the windows. The door, a relatively modern replacement, is topped with a narrow transom. Other entrances are located in the north elevation of the main section and in the east and west elevations of the ell. All are framed similarly to the windows and employ six-panel doors.

A one-story porch supported by chamfered square posts extends along the front elevation. Extending along the entire east wall of the ell is a double porch framed under the main roof span.

The roof of the main section is quite steeply pitched with high brick chimneys extending from inside each gable end. The rear ell has a slightly lower roof peak with brick chimneys located inside the north gable end and at the jointure of the two sections. Sheet metal roofing terminates at the end walls with tapered barge boards. The eaves are finished with simple boxing.

The interior of the main section is bisected by an entrance and stair hall. East of the hall are two rooms, each with a corner fireplace. West of the hall is one large room across which, in recent years, has been run a partition ^{has been run}. The rear ell has been divided into two rooms, each with a fireplace. Interior hardware includes large brass box locks and large hinges with round flanges. Marks on the door indicate, however, that these hinges are not original. Interior doors have six panels which are not raised above the stiles.

7. Description (Continued)

Immediately behind the house is a two-story stone and brick kitchen with a bake oven. South of Route 34 is a large frame bank barn set on stone foundations. No physical evidence remains of the mill or other dwellings which were part of the complex.

Surviving Civil War photographs of the milling complex show that this house was covered with what appears to be white weatherboarding. Just southeast of the present house was a large two-story dwelling covered with wooden siding and possibly displaying some stone construction. It had a double porch extending across its entire front elevation and had a large centrally placed chimney stack.

South of present Route 34, and east of the barn was the mill and a one and a half story dwelling with an exterior stone chimney. East of the creek and south of Route 34, was a two-story, three bay stone dwelling. These buildings have not survived to the present. A 1902 deed to the property (Liber 116, folio 163) describes the land as being "improved with a two-story, weather-boarded dwelling house with back building, a large bank barn, a stone and frame grist mill and saw mill, a stone, two-story dwelling house and other farm buildings"

Mention should also be made of the three arched stone bridge built by Silas Harry in 1824. Known as the middle bridge after the Battle of Antietam, it was destroyed by high water late in the 19th century.

The remaining buildings at Mt. Pleasant are in deteriorated to fair condition. The property contains 130 acres.

8. State of Significance (Continued)

According to Orndorff family history, flour from the mills was shipped to eastern centers and helped to supply American troops during the Revolution.

The Mt. Pleasant property is also important for its association with significant military events in United States history. Several members of the Orndorff family were officers of the Maryland Militia. According to family history, the Orndorff house, during the Revolution, was the scene of many military and policy making conferences, hosted by Christian Orndorff, member of the Maryland Committee of Safety. General Horatio Gates is said to have been one of many military officers who stayed at the Orndorff home.

Later, during the Civil War, Mt. Pleasant was in a prominent position at the "Middle Bridge" in the Battle of Antietam. Although no extensive action was recorded in the immediate area, the bridge and the road past Mt. Pleasant was strategic in the movement of troops.
